

NALAIYA THIRAN

ASSIGNMENT-1

USER CASE: PERSONAL ASSISTANCE FOR SENIORS WHO ARE SELF RELIANT

BY TEAM MEMBER 1: ISHRATH BEGUM.I

Build a python code, Assume you get temperature and humidity values (generated with random functions to a variable) and write a condition to continuously detect alarm in case of high temperature

CODE:

"Let us consider normal temperature=30 Celsius and normal humidity=40%"

```
import random
```

```
Temperature=random.randint(1,100)
```

```
Humidity=random.randint(1,100)
```

```
print(Temperature)
```

```
print(Humidity)
```

```
if((Temperature>30)&(Humidity>40)):
```

```
    print("Temperature and Humidity are HIGH!!! ")
```

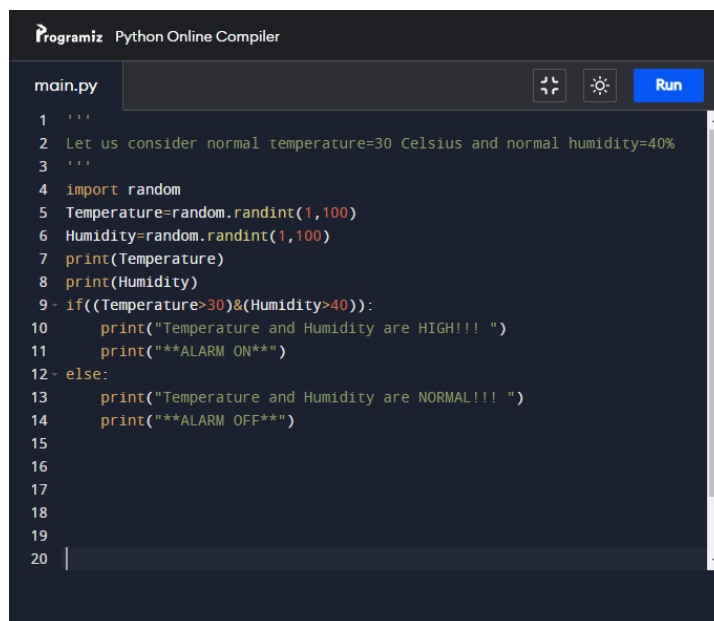

```
    print("**ALARM ON**")
```

```
else:
```

```
    print("Temperature and Humidity are NORMAL!!! ")
```

```
    print("**ALARM OFF**")
```

OUTPUT:

The screenshot shows a web-based Python compiler interface. At the top, it says "Programiz Python Online Compiler". Below this, there's a tab labeled "main.py". To the right of the tab are icons for a full-screen mode, a settings gear, and a blue "Run" button. The main area is a dark-themed code editor with line numbers from 1 to 20 on the left. The code is as follows:

```
1  '''
2  Let us consider normal temperature=30 Celsius and normal humidity=40%
3  '''
4  import random
5  Temperature=random.randint(1,100)
6  Humidity=random.randint(1,100)
7  print(Temperature)
8  print(Humidity)
9  if((Temperature>30)&(Humidity>40)):
10     print("Temperature and Humidity are HIGH!!! ")
11     print("**ALARM ON**")
12  else:
13     print("Temperature and Humidity are NORMAL!!! ")
14     print("**ALARM OFF**")
15

```

On the right side of the code editor, there is a vertical scrollbar. The output of the program is not visible in this screenshot.
